1. Start the application.
2. Display the login page.
3. User to enter their username and password.
4. Verify the user's credentials:
   - If the credentials are valid, proceed to the next step.
   - If the credentials are invalid, display an error message and return to the login page.
5. Display the options menu:
   - My Camera
   - Rent a Camera
   - View All Cameras
   - My Wallet
   - Exit
6. User to select an option.
7. Based on the selected option:
   - If "My Camera" is selected:
     - Display sub-options: "Add", "Remove", "View My Cameras", "Go to Previous Menu".
     - Prompt the user to select a sub-option.
     - Perform the corresponding action based on the sub-option selected.
   - If "Rent a Camera" is selected:
     - Display a list of available cameras.
     - User to enter the ID of the camera they want to rent.
     - Check if the camera is available.
     - If available, check if the wallet balance is sufficient.
       - If sufficient, rent the camera and deduct the price from the wallet balance.
       - If insufficient, display an error message.
     - If not available, display an error message.
   - If "View All Cameras" is selected:
     - Display a list of all cameras.
   - If "My Wallet" is selected:
     - Display the current balance of the wallet.
     - Prompt the user if they want to deposit money (yes or no).
       - If yes, prompt the user to enter the amount to deposit and update the wallet balance accordingly.
       - If no, return to the previous menu.
   - If "Exit" is selected:
     - End the application
